

Click 'Users' > 'User List'

- Admins and staff are the personnel who access Endpoint Manager (EM) to manage devices and resolve issues. You can convert a user to a staff member by assigning them the appropriate role.
- The role determines their permissions in the Endpoint Manager interface. ITarian ships with a number of predefined roles and you can create custom roles as required.
- Admins and staff created in ITarian are automatically imported to EM with the same role they have in ITarian.
- Staff you directly create in EM are only available in EM. They are not available to other ITarian modules like Service Desk and Secure Internet Gateway.

Use the links below to jump to the task you need help with:

- [Add staff in ITarian](#)
- [Add users in Endpoint Manager](#)
 - [Manually add users](#)
 - [Import users from .csv](#)
- [Assign roles to users / staff](#)
 - [Assign roles to a user](#)
 - [Assign staff to a role](#)

Add staff in ITarian

Admin and staff added to ITarian are available in all ITarian modules, including Service Desk, Secure Web Gateway, CRM, cWatch and more.

- Login to ITarian
- Click 'Management' > 'Staff'
- Click 'New Staff'
- Complete the new staff form:

New Staff

Name *

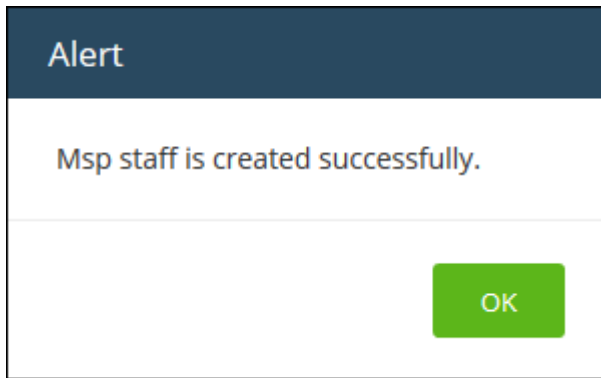

Email *

Role *

Select Role... ▼

Save

- **Name** - First and last name of the admin/staff member.
- **Email** - Contact email address of the admin/staff member.
 - The account activation mail is sent to this address.
 - The email address doubles-up as their username to login to ITarian
- **Role** - Select the role of the admin/ staff from the drop down. You can always change this later if required.
- Click the 'Save' button.

- Click 'OK'

A confirmation mail is sent to the user containing an account verification link. The user should click the link to verify their account then create an ITarian password.

- Once verified, the staff member is enrolled as a user in Endpoint Manager. You can view all users at 'Users' > 'User List'.
- You can now assign a role with admin or staff privileges to the user.

Next: [Assign role to users / staff](#)

Add users in Endpoint Manager

Staff you add directly to EM are available only in EM. They are not available in other ITarian modules like Service Desk. Once added, you can assign roles with different permissions to the staff member.

There are two ways you can add users:

1. **Manually.** Add individual users to EM

- Click 'Users' > 'User List' > 'Create User' to start this process.
- You need to specify their name, email address, the company they belong to, and their EM role.
- See [Manually Add Users](#) if you need help with this.

2. **Import from .csv.** Import a list of users from a comma separated values file.

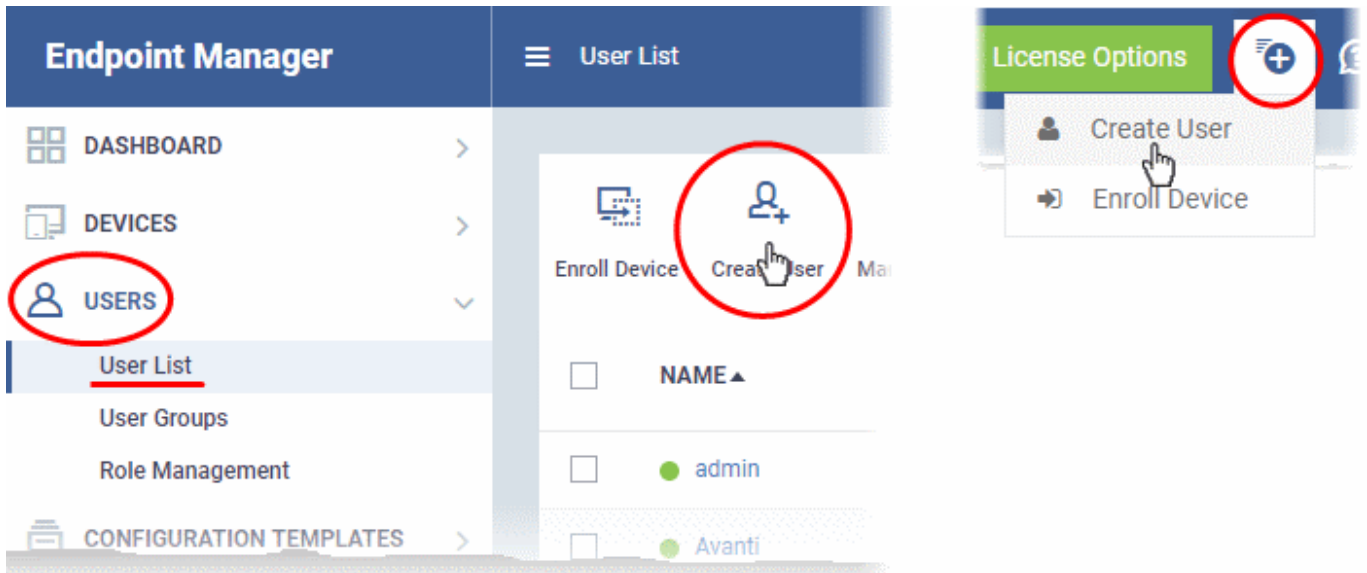

- Click 'Users' > 'User Import' to start the process
- The file should contain the following, separated values: 'Username' (mandatory), 'Email address' (mandatory) and 'Phone number' (optional).
- The file should not contain column headers and each line should contain a single user.
- Users are assigned the role you specify in the import dialog.
- See [Import Users from CSV](#) if you need help with this

Users assigned with a role with admin privileges will receive an account activation email.

Manually add users

- Login to 'ITarian'

- Click 'Applications' > 'Endpoint Manager'
- Click 'Users' > 'User List'
- Click the 'Create User' button
or
- Click the 'Add' button  on the menu bar and choose 'Create User':

Username - Enter the login username for the user.

Email - Account activation and device enrollment mails are sent to this address. The email address doubles-up as the username for the staff to login to EM.

Phone Number (optional) - The contact number of the user.

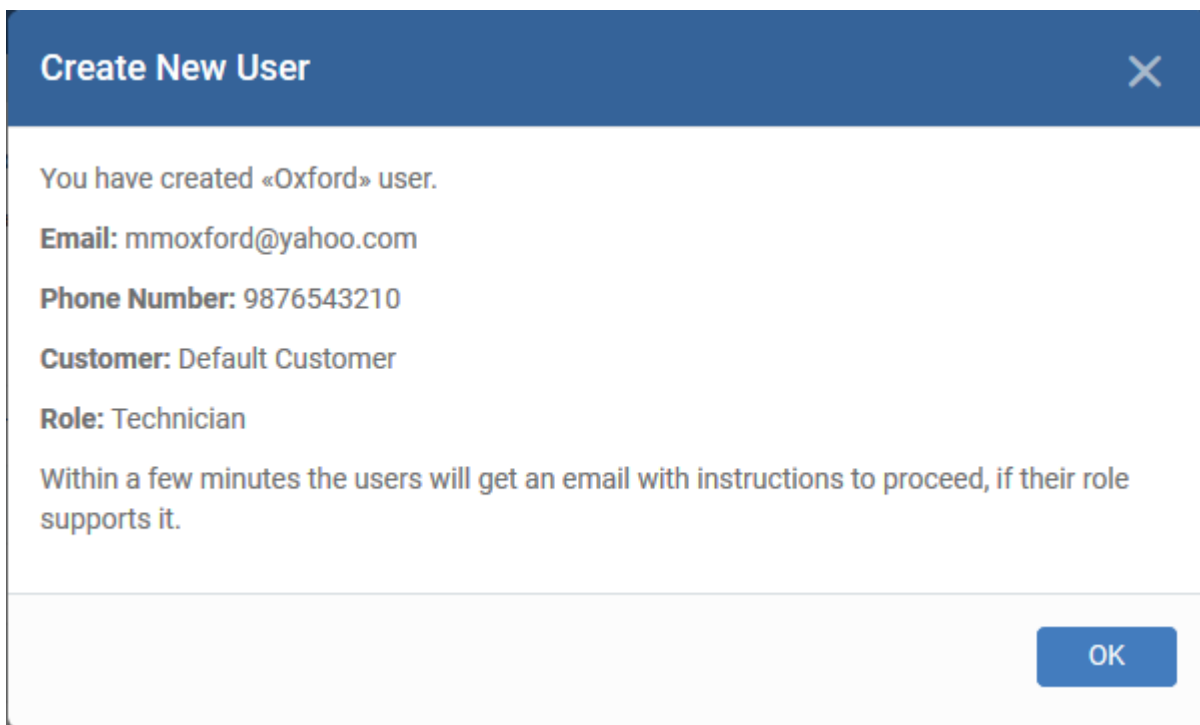

Customer - Choose the company to which the user belongs.

- MSP customers can add users from any company they have added to their account.
- Enterprise customers can only add users to the default company.

Assign role - Select the role you want to assign to the new user:

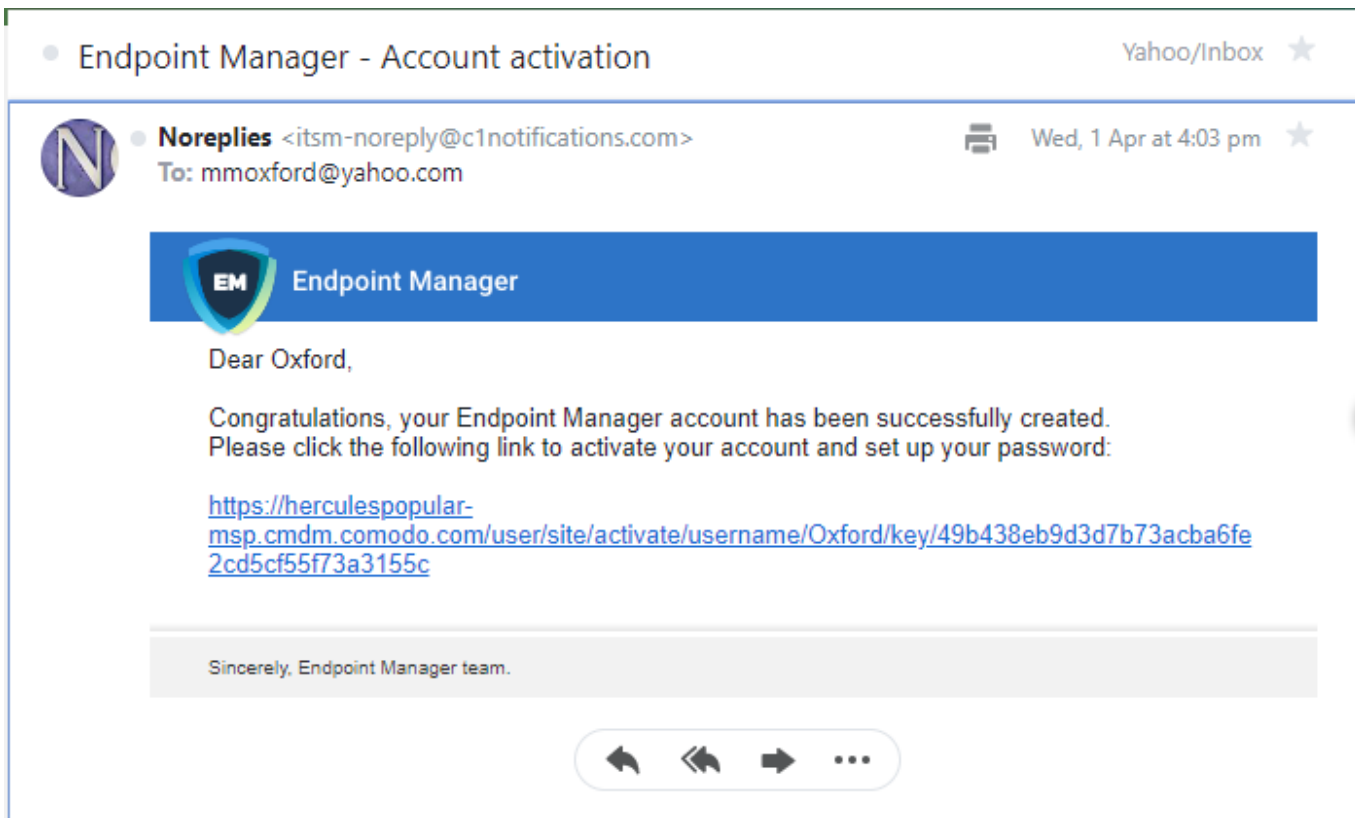

EM ships with three default roles:

- **Administrators** - Can login to EM and access all management interfaces. This role can be edited as required.
- **Technician** - Can login to EM and access all management interfaces. The technician role has fewer privileges than the administrator role. This role can be edited as required.
- **Users** - Cannot login to EM. If required, you can change role permissions to have access to the admin console.
 - You can create custom roles which grant access to selected areas of EM. These roles can be assigned to users as required.
 - All roles created in EM appear in the 'Assign Role' drop-down when adding a new user. See [this wiki](#) to learn more about creating new roles in EM.
- Click 'Submit' to create the user.

- Repeat the process to add more users.

Account activation mails are sent to users that have with roles with admin privileges. They can activate their account and set their login password by clicking the link in the email. An example mail is shown below:

- After activation, the user can login to EM with their user-name and password. Login at: <https://<your company name>-msp.cmdm.comodo.com/> as shown in the mail link.
- The user may also have to setup two factor authentication if this feature has been enabled by the account admin.

Import users from a .csv file

You bulk-import users from a .csv file to accelerate the user-creation process. You can create .csv files in spreadsheet applications like Microsoft Excel or OpenOffice Calc.

Create a .csv file

- Open Excel or Open Office Calc.
- Each row of the spreadsheet represents one user.
- You need to enter user information in the first three columns of each row:
 - Username (mandatory)
 - Email address (mandatory)
 - Phone number (optional)
- For example, "james", "james@ditherscons.com", "9876543210"
- The .csv should not contain column headers
- Click 'Save as...' then select .csv from the options.

Import users from .csv

- Click 'Users' > 'User List'
- Click 'Import User' in top-menu:

The screenshot shows the 'Endpoint Manager' interface. On the left, the 'USERS' menu item is circled in red. In the top navigation bar, the 'Import User' button is also circled in red. A red arrow points from the 'Import User' button to the 'User import' section below.

User import

Uploading status: **Ready**

CSV file *

Customer * Role *

Do not send any enrollment notifications

Use this page to import multiple users from a user list in CSV format.

Important:

- use only comma (,) as a field delimiter;
- enter user names in the 1st column and email addresses in the 2nd column (both are mandatory), 3rd column is for phone numbers (optional);
- use no column headers.

CSV File - Click 'Browse' and navigate to your [saved](#) .csv.

Customer - The company to which you want to add the user.

- MSPs can add users to any customer they have added to their account. Type the first few letters of the company name and select from the suggestions.
- Enterprises can only add users to the default company. Enter 'Default Company' in the 'Company' field.

Role – Choose the role you want to assign to all users in the list. Type the first few letters of the role and select from the suggestions.

EM ships with three default roles:

- **Administrators** - Can login to EM and access all management interfaces. This role can be edited as required.
- **Technician** - Can login to EM and access all management interfaces. The technician role has fewer privileges than the administrator role. This role can be edited as required.
- **Users** - Cannot login to EM. If required, you can change role permissions to have access to the admin console.
 - You can create custom roles which grant access to selected areas of EM. These roles can be assigned to users as required.
 - All roles created in EM appear in the 'Role' suggestions. See [this wiki](#) to learn more about creating new roles in EM.

Do not send any enrollment notifications - Choose whether account creation and account activation emails are sent to imported users. Note: Notification mails are not sent if you select the 'Users' role.

Click 'Import users from List' when you are ready.

- You can view all imported users at 'Users' > 'User List'.
- Account activation mails are sent to users that have with roles with admin privileges. This includes the standard 'Administrator' and 'Technician' roles. They can activate their account and set their login password by clicking the link in the mail.

Assign roles to users / staff

- You can assign staff to a 'standard' Endpoint Manager role, or to a custom role that you create.
- You can assign multiple roles to a single user.
- Click 'Users' > 'Role Management' > 'Roles' to view, add and manage roles.
- See [this wiki](#) if you want help to create a custom role.

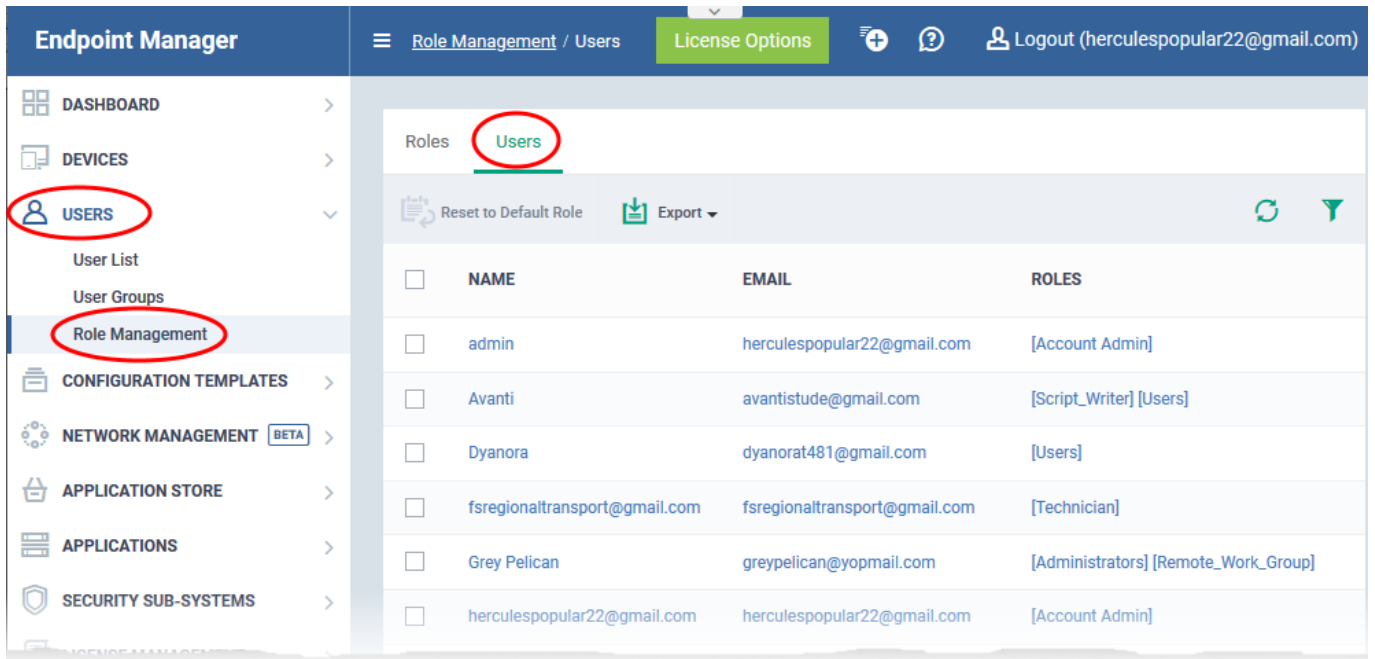

There are two ways to assign roles to staff:

- [Assign roles to a user](#)
- [Assign staff to a role](#)

Assign roles to a user

The 'Users' tab lets you view the roles assigned to each user. A role governs a users permissions within Endpoint Manager. You can add new roles to a user, or remove roles from a user.

- Click 'Users' > 'Role Management'.
- Select the 'Users' tab.

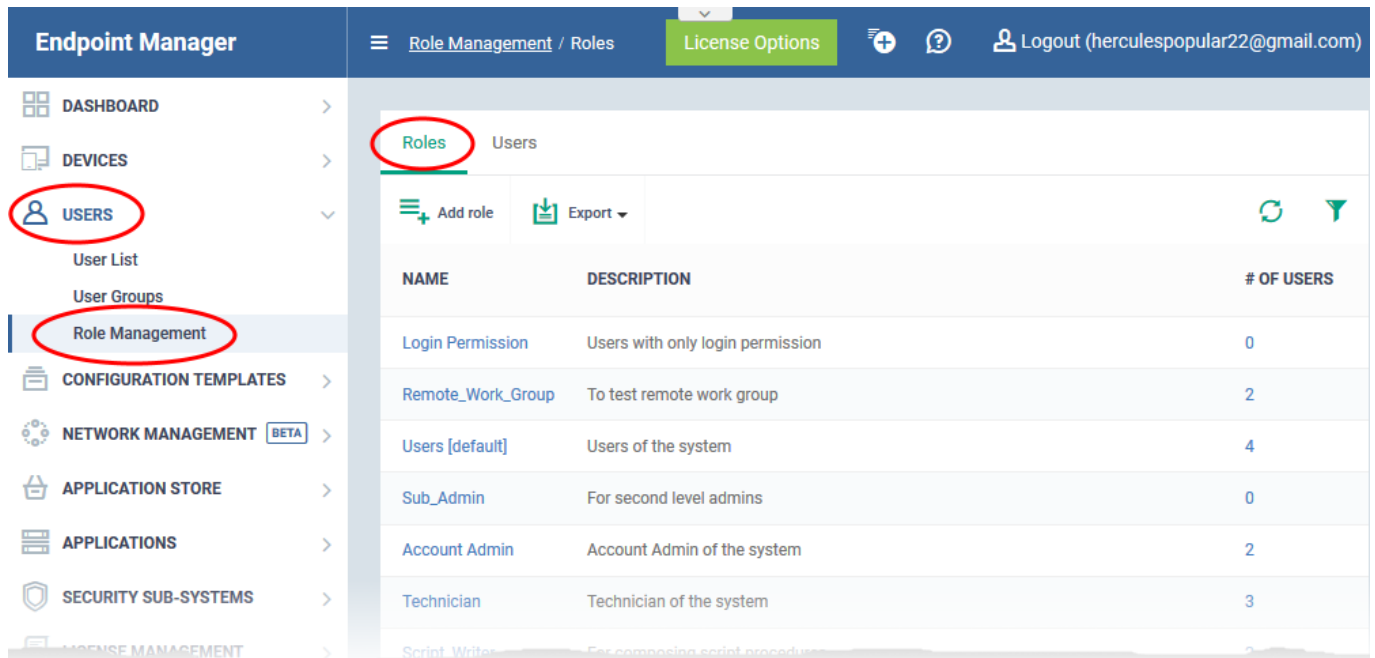

- Click the name of the user whose roles you want to manage.
- The interface shows all roles you can assign to the user.
- Click 'Assign to Role' to delegate a new role to the user .
- Click 'Remove from Role' to withdraw membership of a role from a user.

Roles		<u>Users</u>
Roles of Oxford		
NAME	ACTION	
Account Admin	Assign to Role	
Administrators	Remove from Role	
Login Permission	Assign to Role	
Remote_Work_Group	Assign to Role	
Script_Writer	Assign to Role	
Sub_Admin	Assign to Role	
Technician	Assign to Role	
Users [default]	Assign to Role	

See [this wiki](#) if you want help to create a custom role.

Assign staff to a role

- Click 'Users' > 'Role Management'.
- Select the 'Roles' tab.

The screenshot displays the Endpoint Manager interface. The left sidebar contains navigation options: DASHBOARD, DEVICES, **USERS** (circled in red), User List, User Groups, **Role Management** (circled in red), CONFIGURATION TEMPLATES, NETWORK MANAGEMENT (BETA), APPLICATION STORE, APPLICATIONS, SECURITY SUB-SYSTEMS, and LICENSE MANAGEMENT. The main content area is titled 'Role Management / Roles' and features a 'License Options' button. Below this, the 'Roles' tab is selected and circled in red. The interface includes an 'Add role' button and an 'Export' dropdown. A table lists the following roles:

NAME	DESCRIPTION	# OF USERS
Login Permission	Users with only login permission	0
Remote_Work_Group	To test remote work group	2
Users [default]	Users of the system	4
Sub_Admin	For second level admins	0
Account Admin	Account Admin of the system	2
Technician	Technician of the system	3
Script Writer	For composing script procedures	0

- Click on a role name then click the 'Assign Users' tab:

NAME	EMAIL	ACTION
admin	herculespopular22@gmail.com	Assign to Role
Avanti	avantistude@gmail.com	Assign to Role
Dyanora	dyanorat481@gmail.com	Assign to Role
fsregionaltransport@gmail.com	fsregionaltransport@gmail.com	Remove from Role
Grey Pelican	greypelican@yopmail.com	Assign to Role
herculespopular22@gmail.com	herculespopular22@gmail.com	Assign to Role
Impala	impalachevy@gmail.com	Assign to Role
john22grey@yopmail.com	john22grey@yopmail.com	Remove from Role
John Smith	fiatliena@gmail.com	Assign to Role
Oxford	mmoxford@yahoo.com	Assign to Role

The 'Name' column shows all available users, The links in the 'Action' column indicate whether they are currently assigned the role.

- Click 'Assign to Role' to place a user in the role.
- Click 'Remove from Role' to unassign a user from the role.
