

ITarian now provides information about upcoming releases using its new feature. In order to know about the upcoming release and outage information, ITarian portal has a new announcement bar on the login page and the dashboard as well.

Step 1: Open ITarian portal. In the login page, you will see login credentials input form. On the right side of the login page, you will see the upcoming release information if available.

Now you will see the updates information displayed on the login page as mentioned below.

Step 2: After logging into the ITarian portal you will be on the dashboard page. On the top of the dashboard page, you will see the upcoming release and the outage information as mentioned below. This banner is clickable and when you click the banner you can reach the announcement details.

This helps the customers to be aware of the release dates and informations.
