

- Configuration profiles let you specify a device's network access rights, overall security policy, scan schedule and other general settings.
- Once created, profiles can be applied to devices/device groups, and users/user groups.
- You can use a Comodo-provided 'Default' profile, or configure your own custom profile.
- 'Cloning' a profile is a fast way to create a custom profile without starting from scratch. You can just edit the cloned profile to implement the specific settings you want.

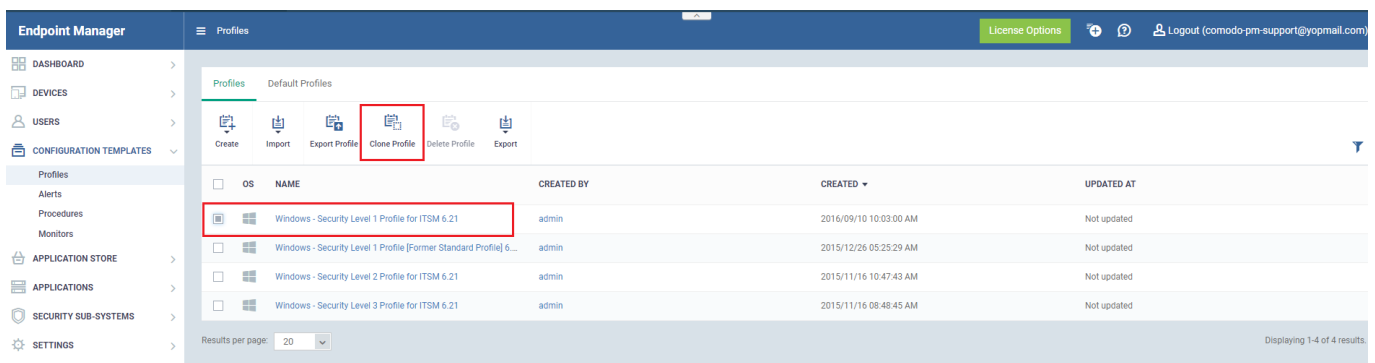

## Clone a profile

- Log into ITarian
- Click 'Applications' > 'Endpoint Manager'
- Click 'Configuration Templates' > 'Profiles'

## Select the profile you want to clone

- Click the 'Default Profiles' tab if you want to use a Comodo preset as your template. The settings in default profiles are explained [here](#) and [here](#)
- Make sure the profile you select is designed for the OS of your target devices
- You can filter profiles by clicking the funnel icon on the right
- Click the 'Clone Profile' button.

- Provide a name and description for the profile then click 'Clone':

- Your new profile is now ready for customization and deployment.

## Customize the profile

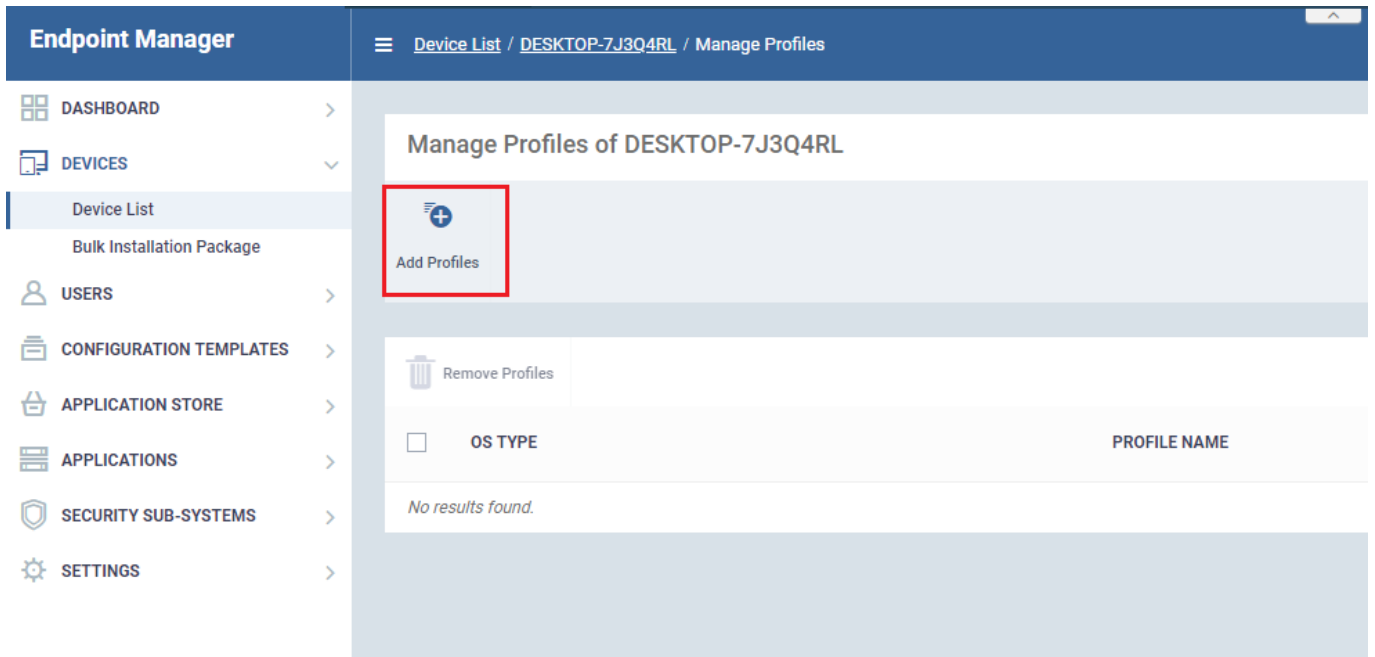

- Log in to ITarian. Click 'Applications' > 'Endpoint Manager'
- Click 'Configuration Templates' > 'Profiles'
- Click the name of the profile you just cloned. This will open the profile configuration screen.
  - You can now configure the profile as you see fit
  - Click the 'Add Profile Section' button if you wish to add a new module.
  - You can find help on specific profile settings in other articles in this wiki. Try searching for the item you need help with at <https://wiki.comodo.com/frontend/web/>
  - The Endpoint manager user guide also has lots of help with profile settings. [Click here](#) to view.
- Click 'Save'.

## Deploy the profile to devices

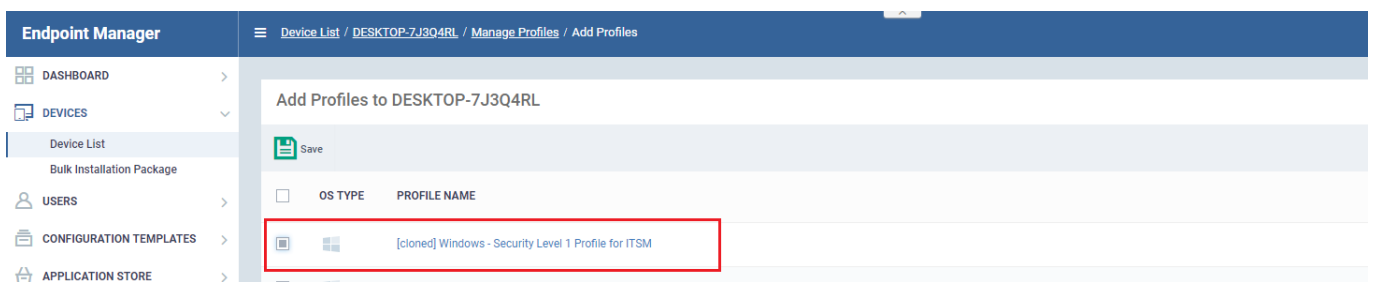

- Log in to C1. Click 'Applications' > 'Endpoint Manager'
- Click 'Devices' > 'Device List' > 'Device Management'
- Select the devices to which you want assign your new profile
  - OR click 'Group Management' and select a device group
- Click the 'Manage Profiles' button:

OS	NAME	ACTIVE COMPONENTS	PATCH STATUS	COMPANY	OWNER	LAST ACTIVITY
	DESKTOP-7J3Q4RL	AD	2	ComodoPMSupport	comodo-pm-support@yopmail.com	2018/08/30 02:50:25 PM
	DESKTOP-FM305D	AD	2	ComodoPMSupport	comodo-pm-support@yopmail.com	2018/08/30 02:50:30 PM

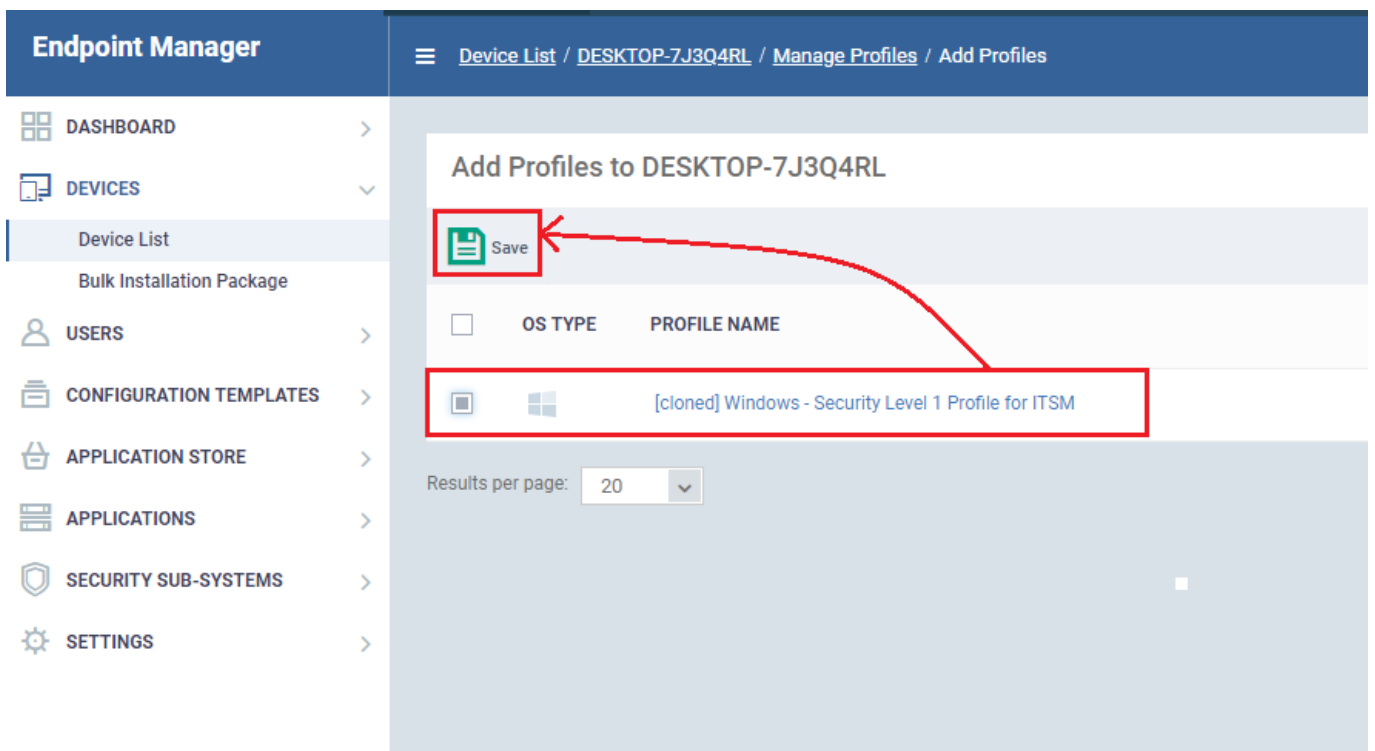

- Click the 'Add Profiles' button:

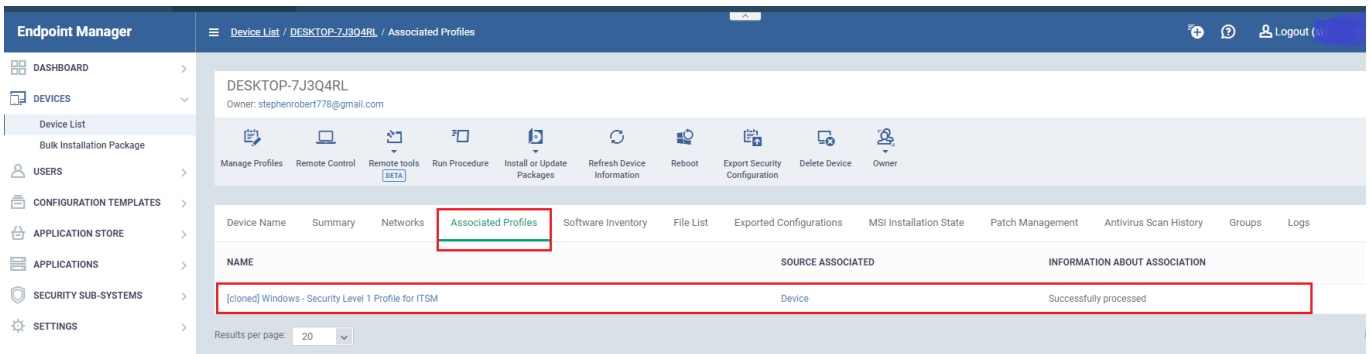

- Select your new profile from the list:

- Click "Save" to apply the profile to the target devices/groups

- The profile will be applied to the targets on the next sync
- The profile will be listed in the device or group's 'Associated Profiles' area:

### Remove the profile:

- Select the devices in which you want to remove the profile.
  - OR click 'Group Management' and select a device group
- Click the 'Manage Profiles' button:
- Select your profile and click **'Remove Profiles'** button.
