

This article help to get registration link and generate a registration token to enroll the device.

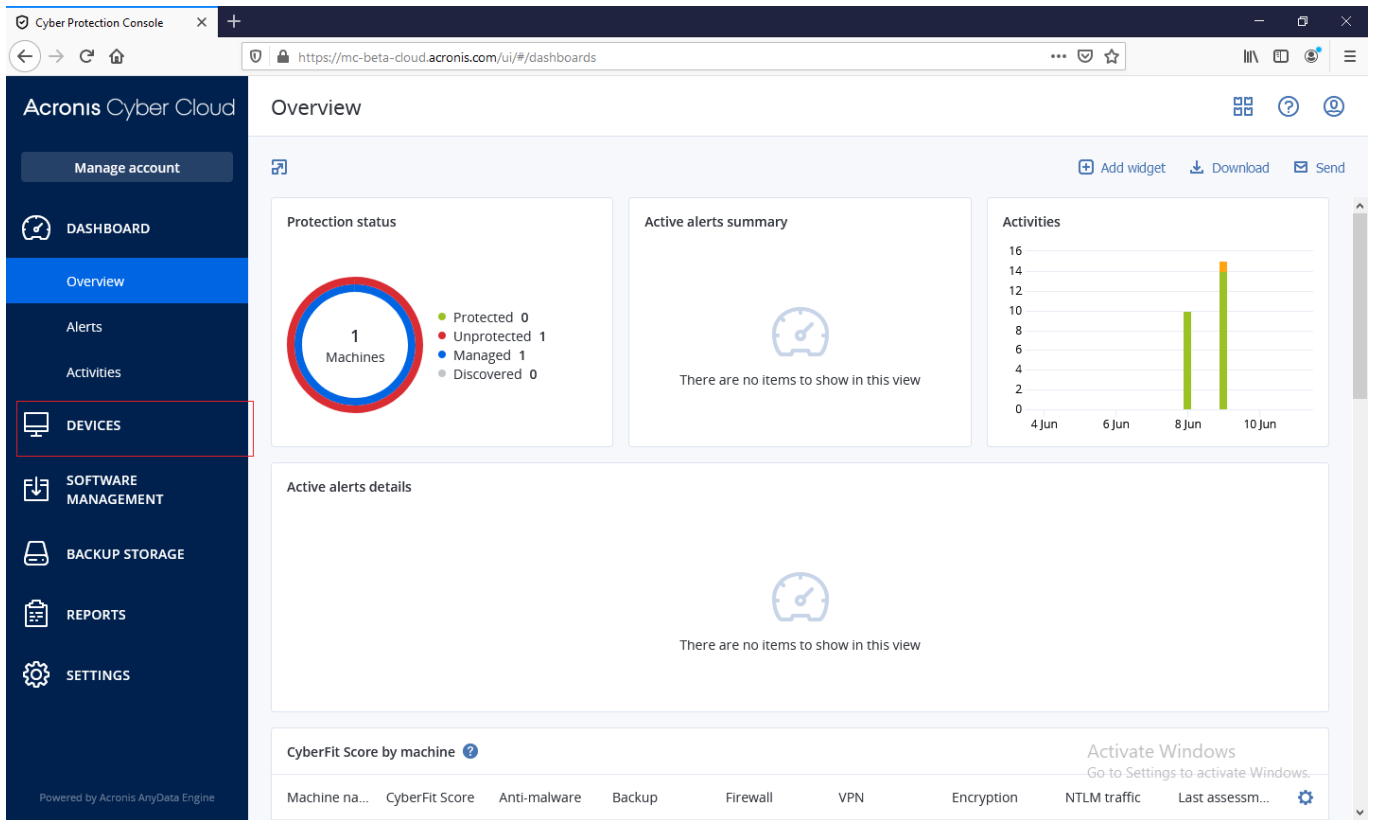

### Step 1 : Fetching registration link

- Use the login link as the registration link ,as highlighted below in the image .  Pass the link the the reg\_site parameter of the script.

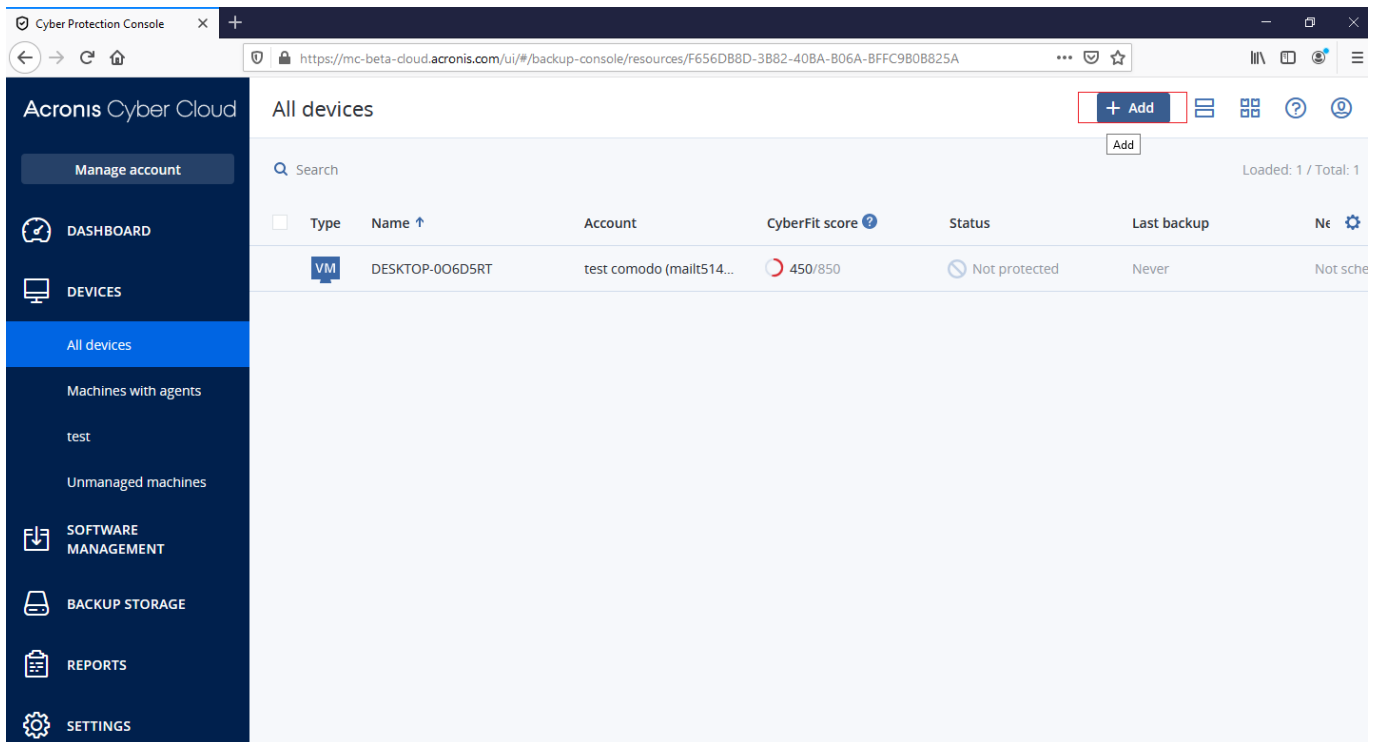

### Step 2: Login into Acronis backup cloud using credentials.

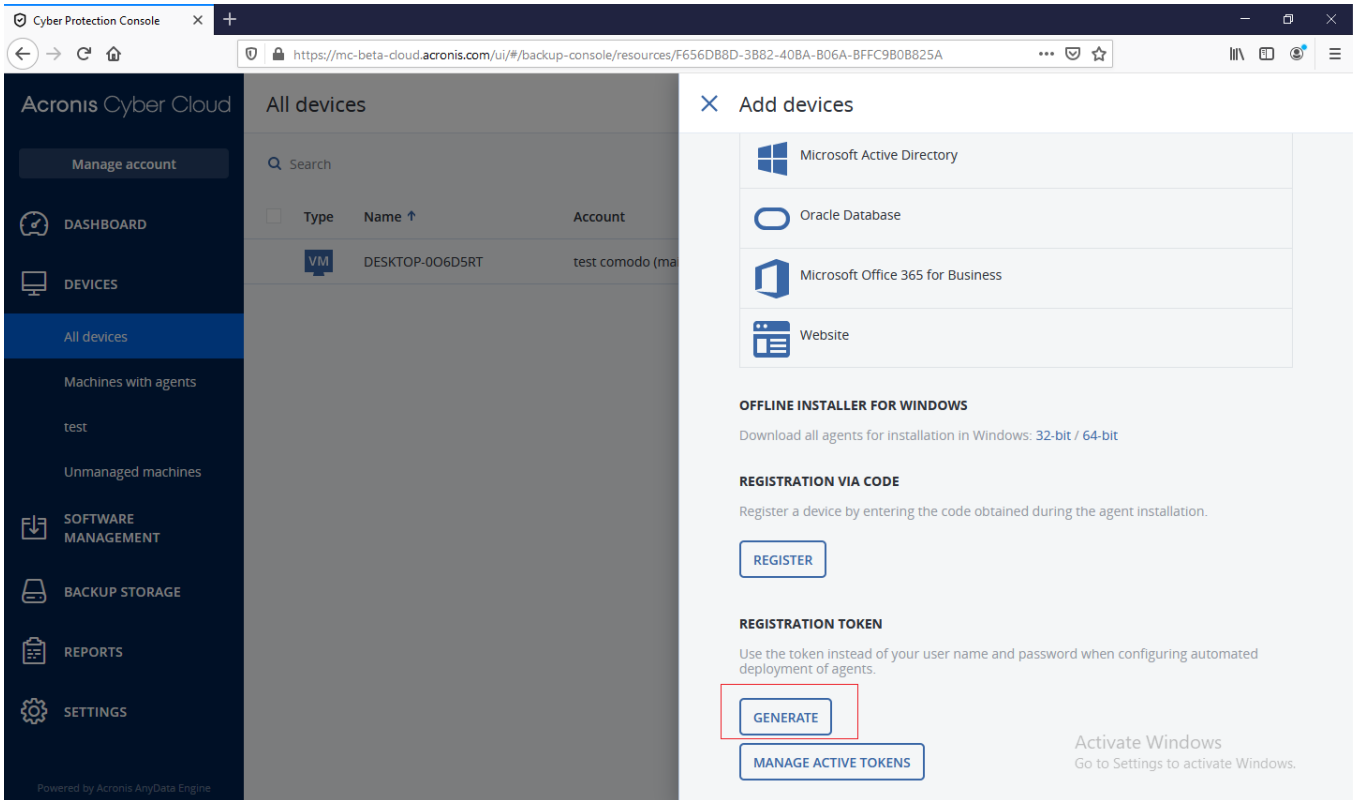

- After Login, You can see the Dashboard and Click on Devices on the left pane as marked in red .

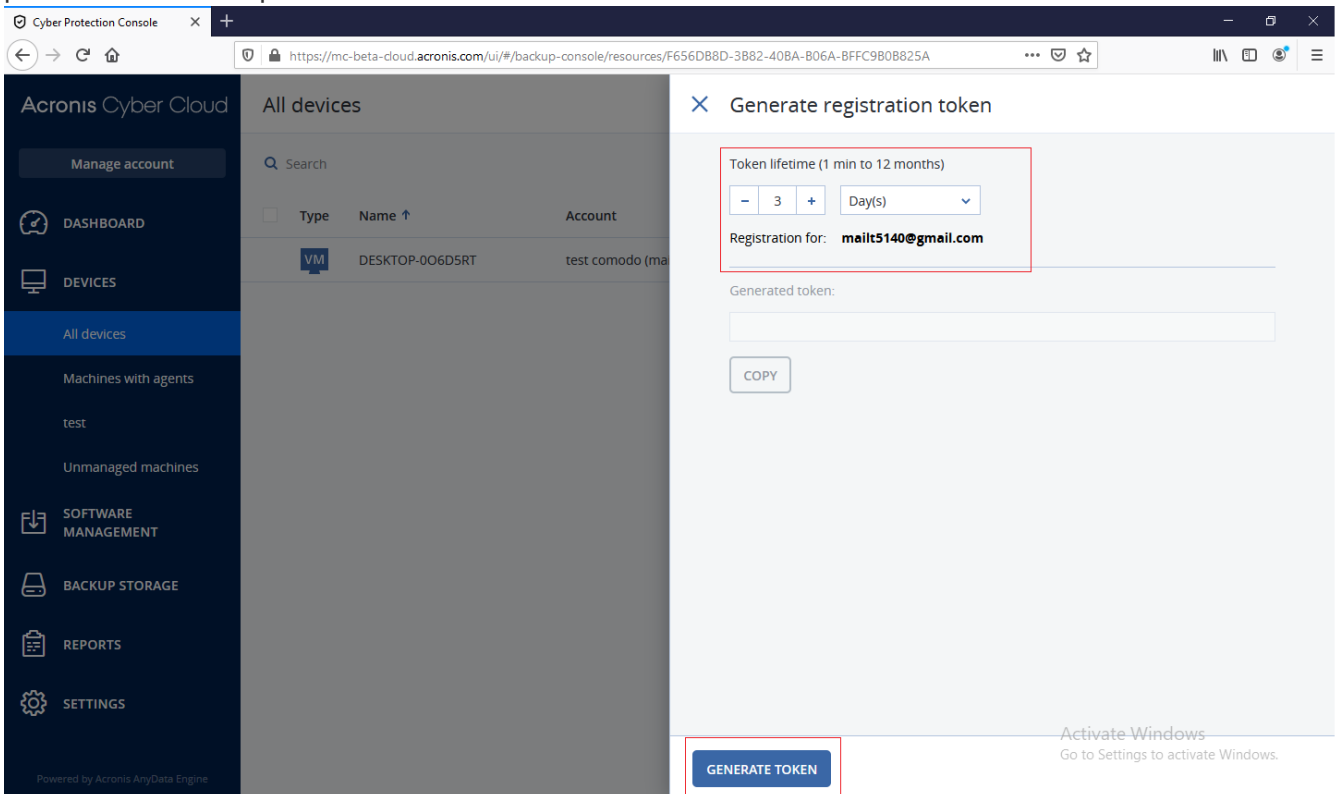

- Click on Add button on the top right corner as marked in red.

- Scroll down the cursor to the end , you can see Regsitration Token tab and Click on generate button.

Once you click on generate button , The token creation tab will open and set the expiration time for token.and Click on generate token button and copy the token . Pass the token to Registration token(reg\_token) parameter in the script.
