

This feature allows admin to filter the notifications generated in Endpoint Manager as per their need. Please refer below steps to use it effectively.

**Step 1: Go to Endpoint Manager → DASHBOARD → Notifications** to see all the notifications generated in Endpoint Manager.

**Step 2: Click "Table filter"** as shown below. The notifications can be filtered using their **Type** or **Message** or **Received Date**.

### Step [3]: Filtering options

**a) Types** - There are five types available in the filtering options. They are explained as below

i) **Success** - This type will list all the successful activities of **Endpoint Manager** and it is notified by a green tick mark.

ii) **Warning** - If any warning event occurs in Endpoint Manager, in notification bar it is notified by a yellow color mark.

iii) **Error** - If an error is received, it is notified by a red alert mark.

iv) **Blocker** - When a blocker is found out by the Endpoint Manager, it is notified by the yellow color in the

notifications.

v)Support - If any support is provided from Endpoint Manager, it is notified by the yellow color mark.

### b) Message

Type the Message to filter the appropriate notifications as shown below.

### c) Received

Type the **Start date** and **End date** to filter notifications from a particular period of their Received time.

For Example, A sample filter is given below.

The screenshot shows the Endpoint Manager interface with a list of notifications. The left sidebar contains navigation options like Dashboard, Audit, Compliance, Valkyrie, Reports, Notifications, Audit Logs, Devices, Users, Configuration Templates, Application Store, Applications, Security Sub-Systems, and Settings. The main area displays a table of notifications with columns for Type and Message. A filter panel on the right is open, showing the 'Type' filter set to 'Success', the 'Message' filter set to 'report', and the 'Received' date range set to '2018/06/25' to '2018/06/28'. The table shows several notifications with a green checkmark icon, indicating success, and one with a red warning icon. The 'Message' column contains text such as 'The new report has been saved as <Default Profiles 2018-06-28 11-02 AM.csv>' and 'Connection to Comodo Account Management server for checking the licenses can not be established! IT and Security Manager Portal will stop working in 3 days.'

After applying a filter, it will list the filtered notifications.

This screenshot shows the same Endpoint Manager interface as the previous one, but with the filtered list of notifications displayed. The filter panel on the right is still open, showing the same filters: 'Type' set to 'Success', 'Message' set to 'report', and 'Received' date range from '2018/06/25' to '2018/06/28'. The table now only displays the notifications that match these criteria, all of which have a green checkmark icon. The 'Message' column contains text such as 'The new report has been saved as <Default Profiles 2018-06-28 11-02 AM.csv>' and 'The new report has been saved as <Device List 2018-06-27 09-45 AM.csv>'. At the bottom of the table, it says 'Results per page: 20' and 'Displaying 1-10 of 10 results'.
