## Create a new feature request

- Login to <https://www.itarian.com/voting/> with your ITarian username and password

The screenshot shows the ITarian website interface. At the top, there is a dark blue header with the ITARIAN logo and navigation links: PRODUCTS, SERVICES, SUPPORT, RESOURCES, COMPANY, and LOGOUT. Below the header, the main content area is titled 'All Feature Requests'. There are several filters and buttons: 'All Statuses', 'All Categories', 'Popular', 'Feature Requests', 'Integration Requests', 'Your Votes', 'Your Request', 'Rules of Conduct', 'New Feature Request' (circled in red), and 'New Integration'. Below these, there are two featured requests: 'Live Chat Functionality' (Planned, 204 votes) and 'File transfer' (Open Discussion, 156 votes).

- Click 'New Feature Request' to open the ITarian forum
- Alternatively, you can directly visit <https://forum.itarian.com/forum/products/feature-requests>
  - Login to the forum if you have an account, Register for an account if you are not yet a member.

- Click 'New Topic'

## Uninstalling OS Patch from all devices or a single selected device

### File transfer

[i...@comodo.com](#) shared this idea 2 years ago

Open Discussion

I would like to have file transfer capability in ITSM for small files, this would allow me to check log files and troubleshoot issues quickly. And also full set of file transfer capabilities in Comodo Remote Control application for replacing another small tool and accomplishing all my device management task from a single application.
