Antivirus scan history helps to display the identified malware files on your endpoint.

**Step [1]:** Go to **Device List** on that choose a device where you need to view the malware file history of your endpoint.

For Example:

## DESKTOP-FMI305D

| Endpoint Manager                          |   |                              |                               |  |              |                    |                | <u>ا</u> © ا              | 요 Logout (stephenrobert778@ | )gmail.com |  |

## Note:

In order to view the history of antivirus for a device, **Comodo client security** needs to be installed on your endpoint.

**Step [2]:** Select **Antivirus Scan History** tab, It will display the list of affected files which are handled by Comodo Client Security. You can sort the following details with Malware name, Path, Action Taken, Action Status, Scan Identification Number along along with date.
